PROFESSIONAL SUMMARY

PAGE 1: ENGLISH (ATS STANDARD)

Fullstack Developer with 3 years of professional experience in Application Support at PT PLN Icon+, transitioning into Software Development. Skilled in building responsive web applications using React, Next.js, and TypeScript on the frontend, paired with Go (Golang), Java Spring Boot, and PostgreSQL on the backend. Strong background in production database troubleshooting, SQL query optimization, and Clean Architecture API design.

PROFESSIONAL EXPERIENCE

Application Support Specialist — PT PLN Icon+

2022 - Present

- Maintained and monitored enterprise application ecosystems, ensuring 99.8% service uptime and resolving critical database/API incidents in production.
- Diagnosed complex SQL queries, database deadlocks, and connection pool bottlenecks across enterprise relational databases (PostgreSQL, Oracle, MySQL).
- Authored system troubleshooting guides and collaborated with cross-functional software engineering teams to resolve underlying bugs and edge cases.

Fullstack & Backend Engineering (Independent) — Open Source & Personal Systems

2022 - Present

- Architected and built over 20+ production-grade repositories in Go, Java Spring Boot, and Next.js, practicing Clean Architecture, TDD, and Docker containerization.
- Designed relational schemas, implemented JWT/RBAC security pipelines, and orchestrated concurrency-safe financial transaction workflows.
- Delivered end-to-end fullstack applications with responsive React/TypeScript interfaces, state management (Redux/Zustand), and automated CI/CD.

FEATURED REPOSITORIES (FULLSTACK & BACKEND GO)

Go Marketplace (Fullstack Go & React)

GO • REACT • GORM • POSTGRESQL • JWT

Fullstack e-commerce marketplace built with Go and React. Features REST API, JWT auth, product catalog management, and transactional PostgreSQL integration.

Go Marketplace Backend (GORM & REST API)

GO • FIBER • POSTGRESQL • GORM • DOCKER

High-performance REST API backend for e-commerce with Go, GORM ORM, and PostgreSQL. Handles atomic checkout transactions and connection pooling.

Go Clean Architecture REST API

GO • CLEAN ARCHITECTURE • DOCKER • POSTGRESQL

Modular Go REST API built with Clean Architecture principles, decoupling domain entities, usecase logic, and database repositories for unit testing.

BayE Marketplace (Fullstack Next.js)

NEXT.JS 14 • REACT • TYPESCRIPT • TAILWIND

Modern e-commerce and auction platform inspired by eBay. Features server-rendered product hydration, dynamic bidding simulation, and responsive cart.

Go Banking Core Engine

GO • ACID TRANSACTIONS • POSTGRESQL • DOCKER

Core financial banking API in Go handling user balance transfers with strict ACID compliance, row-level locking (SELECT FOR UPDATE), and audit logging.

Bun & Hono E-Commerce Backend

BUN • HONO • DRIZZLE ORM • ZOD • JWT

Modern ultra-fast TypeScript backend built on Bun runtime with Hono, Drizzle ORM type-safe SQL queries, Zod schema validation, and RBAC auth.

TECHNICAL COMPETENCIES

Engineering & Frameworks: Next.js, React.js, Go (Golang), Java Spring Boot, Express.js, Node.js, Vue 3, Angular, Python (FastAPI), TypeScript, Tailwind CSS

Databases & Cloud Tools: PostgreSQL, MySQL, MongoDB, Redis, Docker, GORM, Prisma ORM, AWS, Vercel Edge, Git & GitHub, Postman

EDUCATION

Bachelor of Computer Science / Information Technology

2017 - 2022

Universitas Gunadarma • GPA: 3.48 / 4.00

RINGKASAN PROFESIONAL

HALAMAN 2: BAHASA INDONESIA (STANDAR ATS)

Fullstack Developer dengan 3 tahun pengalaman profesional di bidang Application Support pada PT PLN Icon+, bertransisi ke Software Development. Terampil membangun aplikasi web responsif menggunakan React, Next.js, dan TypeScript pada frontend, dipadukan dengan Go (Golang), Java Spring Boot, dan PostgreSQL pada backend. Memiliki fondasi kuat dalam troubleshooting database produksi, query SQL, serta perancangan API Clean Architecture.

PENGALAMAN PROFESIONAL

Spesialis Application Support — PT PLN Icon+

2022 - Sekarang

- Memelihara dan memonitor ekosistem aplikasi korporat, menjaga uptime layanan 99.8% serta menangani insiden kritis database dan API pada server produksi.
- Menganalisis query SQL kompleks, mengatasi bottleneck connection pool dan deadlock pada database relasional (PostgreSQL, Oracle, MySQL).
- Menyusun dokumentasi investigasi sistem dan berkolaborasi erat dengan tim software engineering untuk perbaikan bug dan penanganan edge case.

Pengembangan Fullstack & Backend (Mandiri) — Open Source & Proyek Mandiri

2022 - Sekarang

- Merancang dan membangun lebih dari 20+ repositori berbasis Go, Java Spring Boot, dan Next.js dengan penerapan Clean Architecture, TDD, dan Docker.
- Mendesain skema database relasional, mengimplementasikan pipeline keamanan JWT/RBAC, serta menangani transaksi keuangan aman berbasis ACID.
- Mengembangkan aplikasi fullstack end-to-end dengan antarmuka responsif React/TypeScript, manajemen state (Redux/Zustand), dan deployment CI/CD.

PROYEK REPOSITORI PILIHAN (FULLSTACK & BACKEND GO)

• Go Marketplace (Fullstack Go & React)

GO • REACT • GORM • POSTGRESQL • JWT

Marketplace e-commerce fullstack dengan Go dan React. Dilengkapi REST API, autentikasi JWT, manajemen katalog produk, dan integrasi database PostgreSQL transaksional.

• Go Marketplace Backend (GORM & REST API)

GO • FIBER • POSTGRESQL • GORM • DOCKER

Layanan backend REST API performa tinggi untuk marketplace e-commerce dengan Go, GORM ORM, dan PostgreSQL. Mengelola transaksi checkout atomik dan connection pooling.

• Go Clean Architecture REST API

GO • CLEAN ARCHITECTURE • DOCKER • POSTGRESQL

REST API modular di Go yang menerapkan prinsip Clean Architecture, memisahkan entitas domain, logika usecase, dan repository database untuk kemudahan unit testing.

• BayE Marketplace (Fullstack Next.js)

NEXT.JS 14 • REACT • TYPESCRIPT • TAILWIND

Platform lelang dan belanja modern terinspirasi oleh eBay. Menampilkan hidrasi katalog produk server-rendered, simulasi lelang harga langsung, dan keranjang responsif.

• Go Banking Core Engine

GO • ACID TRANSACTIONS • POSTGRESQL • DOCKER

Layanan transaksi perbankan di Go yang menangani transfer saldo akun dengan kepatuhan ACID ketat, row-level locking (SELECT FOR UPDATE), dan pencatatan audit trail.

• Bun & Hono E-Commerce Backend

BUN • HONO • DRIZZLE ORM • ZOD • JWT

Backend TypeScript modern dan ultra-cepat di atas runtime Bun dengan framework Hono, query database type-safe Drizzle ORM, validasi skema Zod, dan kontrol akses RBAC.

KOMPETENSI TEKNIS

Bahasa & Framework: Next.js, React.js, Go (Golang), Java Spring Boot, Express.js, Node.js, Vue 3, Angular, Python (FastAPI), TypeScript, Tailwind CSS

Database & Cloud: PostgreSQL, MySQL, MongoDB, Redis, Docker, GORM, Prisma ORM, AWS, Vercel Edge, Git & GitHub, Postman

PENDIDIKAN

Sarjana Ilmu Komputer / Teknologi Informasi

2017 - 2022

Universitas Gunadarma • IPK: 3.48 / 4.00
